

Certificate of non-objection

Gin Gliders Inc.

19.09.2024

Gin Gliders Inc. confirm hereby, that the paraglider models Fuse 4 and Fuse mini are identical designs. All major construction features are equal, for example:

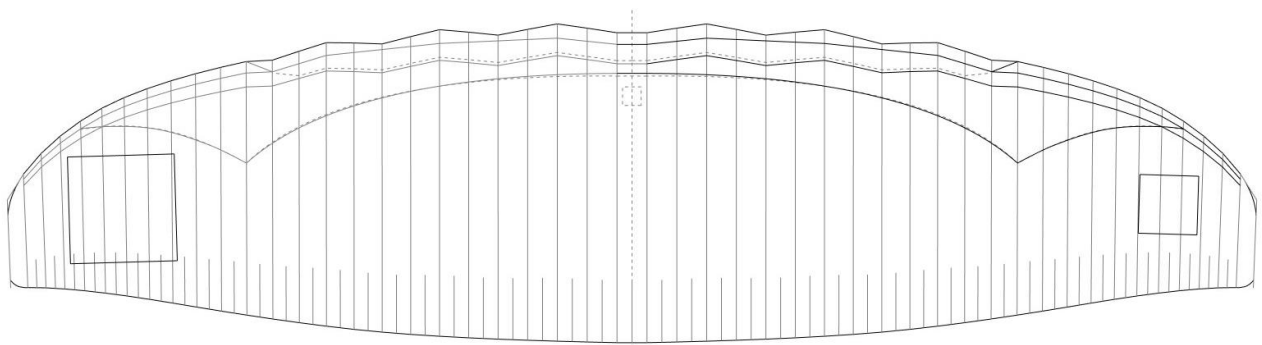

- canopy construction including shape, panels and production procedure
- line geometry, material and construction

The model Fuse mini is the smallest Fuse 4 version which features three modifications comparing to the other Fuse 4 sizes:

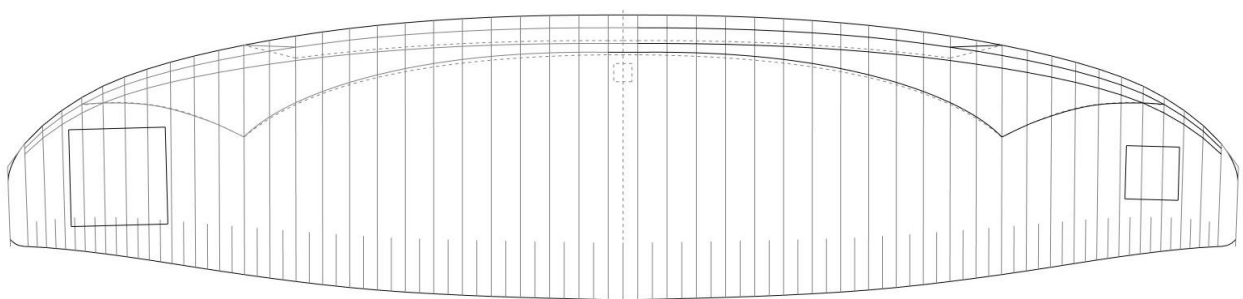

1. WLE

Fuse mini is equipped with the Wave Leading Edge at the front:

Fuse mini

Fuse 4

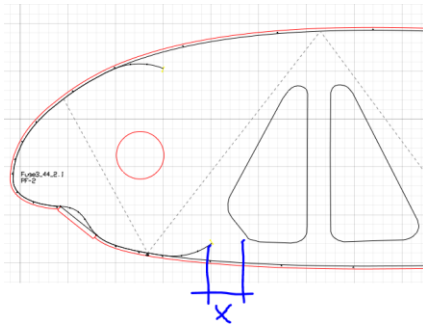

2. Reduced Aspect Ratio (AR)

Fuse 4 44, 41 and 37: AR 5.35
 Fuse mini 32, 35: AR 4.90

Issued/Changed: Gin Gliders Inc.	Released: Gin Seok Song		
R&D GS-02	Valid from: 01.08.2024	Revision: 1.0	Page 1/2

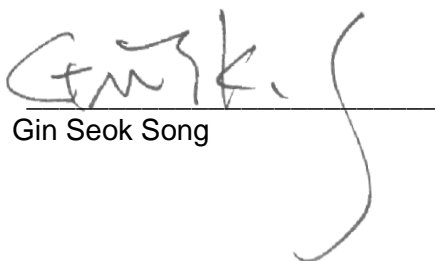

3. Extended bottom plastic rods

The length of the bottom plastic rods is extended about 7% (X value in drawing above, reference to chord length).

As none of the described changes had an influence on the structural design, Gin Gliders Inc. would like to use the existing shock- and load tests from Fuse 4 also for Fuse mini certification.
